Closed-loop camera

PolarFire SoC Discovery Kit

Example

Full frame captured at low FPS.
The fast moving ball blurs.

Red-boxed region only is captured at a high FPS
The fast moving ball stays sharp.

Processing merges relatively slow-changing background with fast-moving object.
Little information is lost compared to a full-frame, high FPS capture.

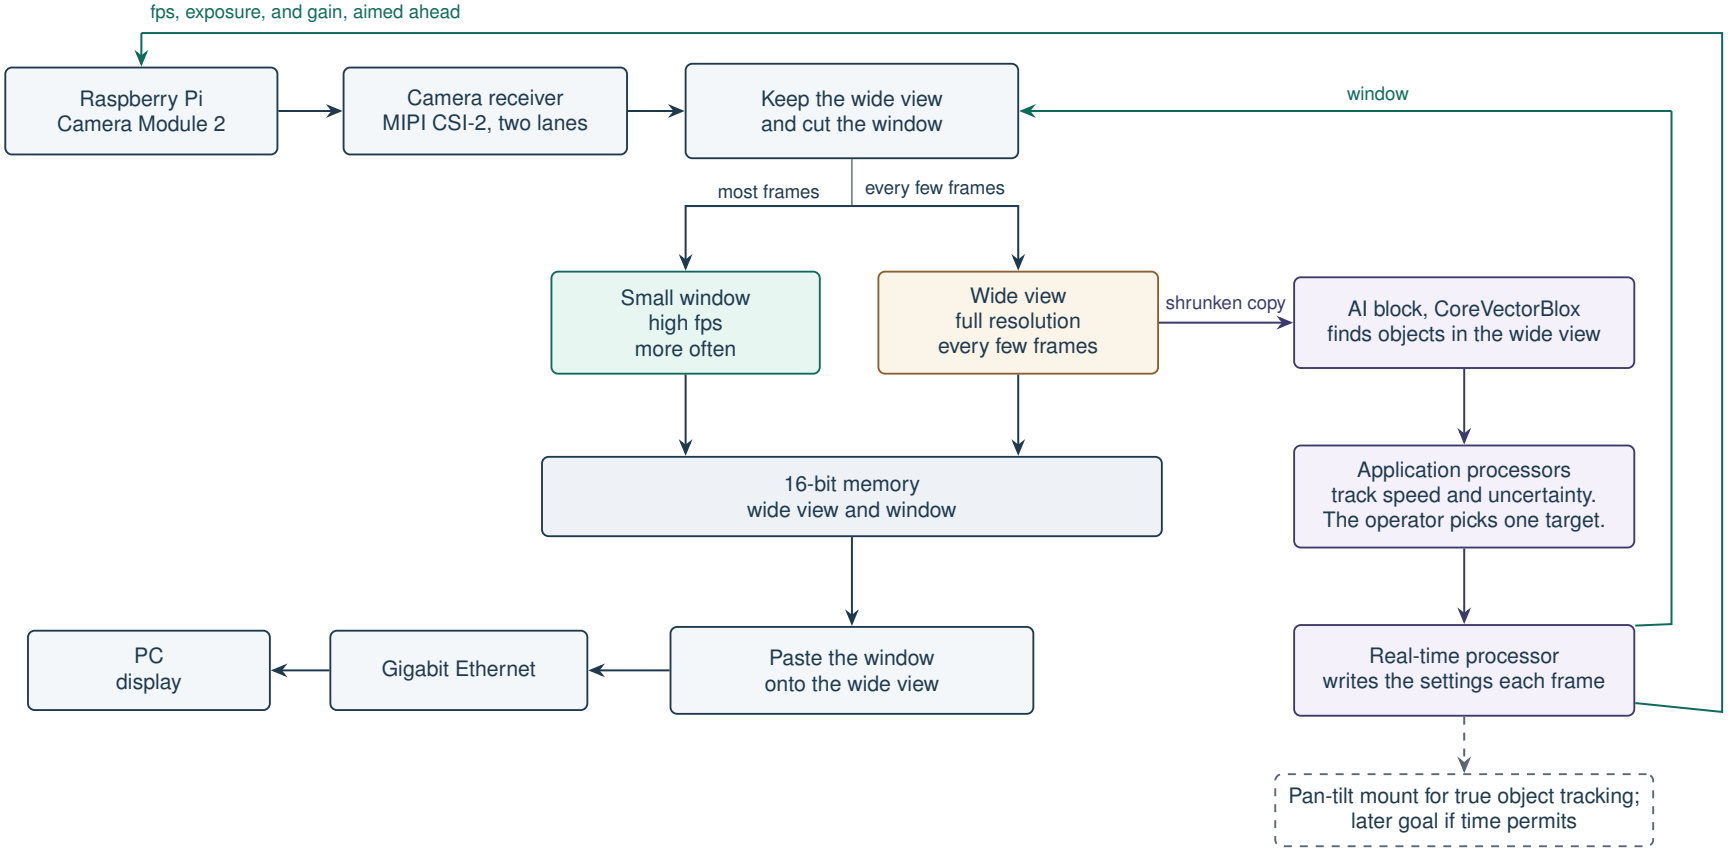

Image sources. The three pictures are an example made from these two images, not a capture from this camera.
